## Program and Project Management Solutions

### Organizational Pain Points:

Whether an organization is new to project management or needs to overhaul an existing system, there are several common stumbling blocks to effective Program and Project Management implementation:

- A lack of Earned Value Management (EVM) expertise in fields where EVM is mandated
- An improper or incomplete understanding of regulatory compliance standards, such as ANSI/EIA 748, UN/CEFACT, or SARBOX requirements
- Cultural resistance to a new Program or Project Management discipline
- An inability to properly track capital investments due to varied and incompatible software systems

### Who is Affected?

- Program Offices in Civilian Government Agencies
- Department of Defense Program Offices
- Government Contractors
- SARBOX-mandated Private Sector Organizations

### Benefits to Resolving Pain Points:

- Improved capital investment tracking through integrated reporting and analysis tools
- Uniform reporting standards that reduce the time needed for compiling and analyzing data
- Certainty that the organization can comply with regulatory requirements, whether in the Public or Private Sector
- A corporate culture that supports and takes ownership of new systems and protocols
- Projects that are strategically aligned with the organization's larger program and portfolio efforts

### Dekker, Ltd. is the Solution for...

- **Software Tools.** Dekker's Program Management Information System (PMIS) software suite includes project tracking and scheduling (Dekker TRAKKER®), Key Performance Indicator (KPI) monitoring and measurement (Dekker Traction™), and web-based project collaboration tools (Dekker iPortfolio®). PMIS Version 8.0 includes a powerful new Oversight and Assessment Module that brings innovative analysis features to program management activities. Dekker is a proud partner of Microsoft and Oracle, and the Dekker PMIS™ suite integrates with most industry-standard commercial software, such as Microsoft Office, financial/ERP, and other project management software.
- **Training.** Through its Dekker University program, web-based courses, and touring Road Shows, Dekker, Ltd. offers training on PPM Best Practices, Earned Value Management, and Software-specific Training. Dekker is a PMI Registered Education Provider, so all courses earn attendees valuable Professional Development Units (PDUs).
- **Consulting.** Often, the biggest barrier to organizational change is cultural resistance from within. Dekker, Ltd. has helped government agencies, contractors, and Fortune 500 companies implement program and project management disciplines since 1984. Dekker can not only design the implementation, but help bridge any cultural gaps that arise. Clients leverage Dekker's extensive expertise to help them design custom business applications, craft proposals, and prepare for integrated baseline reviews.

*Dekker, Ltd. has 25 years experience helping organizations effectively leverage all the resources necessary for effective program and project management system implementation.*
